

Changes made to EER for Phase 2:

- Added strong Category entity with mandatory relationship between it and Item
- Added weak Bid Entity
- Removed identifying "Lists" relationship between User and Item
- Added partial key (Username) to Rating entity
- Made relationship between "User Add Rating" mandatory on the Rating side
- Changed cardinality of Rating to Item entities from 1:N to 1:1
- Changed Item entity from weak to strong; added ItemId primary key
- Updated attribute names: Returnable to IsReturnable in Auction entity;
DateTime to RatingTime in Rating entity
